Subject: RE: Review of Proposed Institutional Goals for 2010-13

Hi Michael,

Here are my comments and questions about the proposed Institutional Goals for 2010-13:

Objective 1.2.b "promoting efforts to evaluate and improve the level of functionality, integration, and articulation of an between our many programs" - **What in the world does all this mean???**

Objective 1.3: "Develop... online learning strategic plan..." - **Will this be a stand-alone plan, or will it be integrated with a comprehensive educational master plan?**

Objective 2.3: "Use evidence based data" - **What is "evidence based data"? How is this different from "data"?**

Objective 3.3: "marking" - should be **"marketing"**
